

## Coproducing information about mental capacity

- The Suffolk Parent Carer Forum have shared that parents and carers would like to have more information about mental capacity regarding decisions for young people with SEND.
- We want the training and information we put together to be coproduced with families, so that it matches what you want to find out and is in a form which is easiest for you to access.
- We are therefore offering three sessions (two online and one face-to-face) so you can tell us what will help build your understanding re mental capacity for young people with SEND.
- You are welcome to join a session for 10/15 minutes to share your thoughts, or you can stay for the whole session. Practitioners who work with families are welcome too.
